

GitHub Deployment Progress Tracker

Live tracker for moving `cryo_leak_rate_dashboard` v4.0.0 from local-only → GitHub + GitHub Pages.

Progress Overview

60% Complete

Phase	Status	Owner
1. Pre-deployment prep	✔ Complete	Agent
2. Documentation & scripts	✔ Complete	Agent
3. Pre-push validation	✔ Complete	Agent
4. Create GitHub repo	↻ Waiting on user	User
5. Push to GitHub	⌚ Pending	User + Agent
6. Enable GitHub Pages	⌚ Pending	User
7. Verify deployment	⌚ Pending	User + Agent
8. Create release PR	⌚ Optional	User + Agent

Detailed Steps

✔ Step 1: Pre-Deployment Preparation (100%)

- [x] Verify git status (clean working tree)
- [x] Check all files committed (HEAD = 6b2f6f6)
- [x] Confirm v4.0.0 is the active version
- [x] Inventory project size and contents
- [x] Create backup strategy documentation

Status: COMPLETE

Time: 0:00 – 0:02

✔ Step 2: Documentation & Scripts (100%)

- [x] BACKUP_STRATEGY.md
- [x] PROGRESS_TRACKER.md (this file)
- [x] GITHUB_REPO_CREATION_STEPS.md
- [x] REUSE_GUIDE.md
- [x] DEPLOYMENT_STATUS.md

- [x] scripts/pre_push_checklist.sh

Status: COMPLETE

Time: 0:02 – 0:08

✓ Step 3: Pre-Push Validation (100%)

- [x] Run `scripts/pre_push_checklist.sh`
- [x] Tests: **22 / 22 passing**
- [x] Manifest: **205 file entries**
- [x] Landing pages: **5 / 5 present**
- [x] Documentation: **8 / 8 required files present**
- [⚠] Link validator: 7 legacy broken internal links (non-blocking — listed in `DEPLOYMENT_STATUS.md`)
- [⚠] Git tree had uncommitted deployment docs at scan time (committed in next step)

Status: COMPLETE — overall result `READY TO PUSH TO GITHUB` (exit 0)

Report: `dist/pre_push_report.txt`

Time: 0:08 – 0:10

🔄 Step 4: Create GitHub Repository (Waiting on user)

- [] Navigate to `https://github.com/new`
- [] Repository name: `cryo_leak_rate_dashboard`
- [] Description: MYRRHA QPLANT Cryogenic Helium Leak Rate Analysis Dashboard v4.0.0 — Single Source of Truth
- [] Visibility: Public (recommended for free GitHub Pages)
- [] **Do NOT** initialize with README / .gitignore / LICENSE (we already have them locally)
- [] Click **Create repository**

Status: WAITING FOR USER ACTION

Reference: `GITHUB_REPO_CREATION_STEPS.md` → Step 1

Time: 0:10 – 0:12

🕒 Step 5: Add Remote and Push (Pending)

- [] `git remote add origin https://github.com/GB0GEB/cryo_leak_rate_dashboard.git`
- [] `git push -u origin main`
- [] `git push --tags origin`
- [] Verify files visible on GitHub

Status: PENDING (depends on Step 4)

Reference: `GITHUB_REPO_CREATION_STEPS.md` → Steps 2–4

Time: 0:12 – 0:15

🕒 Step 6: Configure GitHub Pages (Pending)

- [] Navigate to Settings → Pages
- [] Source: **Deploy from a branch**
- [] Branch: `main` / folder: `/docs`
- [] Save & wait 2–3 minutes
- [] Confirm published URL: `https://gbogeb.github.io/cryo_leak_rate_dashboard/`

Status: PENDING (depends on Step 5)

Reference: `GITHUB_REPO_CREATION_STEPS.md` → Step 5

Time: 0:15 – 0:18

Step 7: Verify Deployment (Pending)

- [] Visit GitHub Pages root URL → should land on `VERSION_SELECTOR.html` or `index.html`
- [] Test `NAVIGATOR.html`
- [] Test `index_v4_0.html`
- [] Test `STAKEHOLDER_PRESENTATION.html`
- [] Spot-check a Plotly plot under `docs/plots/`
- [] Run `scripts/validate_links.py` against the live URL (optional)

Status: PENDING

Time: 0:18 – 0:21

Step 8: Release PR (Optional)

- [] Create release branch `release/v4.0.0`
- [] Push branch
- [] Open PR with `CHANGELOG.md` excerpt as body
- [] Tag reviewers
- [] **Do not auto-merge** — wait for user approval

Status: OPTIONAL

Time: 0:21 – 0:25

Real-Time Log

Timestamp	Event
00:00:00	Tracker initialized
00:00:30	BACKUP_STRATEGY.md created
00:01:30	PROGRESS_TRACKER.md created
00:02:30	GITHUB_REPO_CREATION_STEPS.md created
00:03:30	REUSE_GUIDE.md created
00:04:30	scripts/pre_push_checklist.sh created and made executable
00:05:30	DEPLOYMENT_STATUS.md created
00:06:30	Pre-push checklist executed — report at <code>dist/pre_push_report.txt</code>
00:07:30	All deliverables committed locally
00:07:31	Waiting on user to create GitHub repository

How to update this tracker

When you complete a step, simply tell the agent which step finished and it will:

1. Flip the corresponding ☐ → ☒
2. Update the progress bar
3. Append a new row to the Real-Time Log
4. Move the next step into  In Progress
