

CONTINUATION GUIDE

Date: 2026-05-12

Project: QPLANT Cryo Leak-Rate Dashboard v4.0.0

Decision: Can this chat continue?

✓ YES — This chat can continue

Reasoning: The project is in a clean, well-documented state. All critical fixes have been applied, version consistency is restored, navigation is clear, and stale files are archived. The context window contains full project knowledge.

What Has Been Completed

Phase 1: SLIDE_PACKAGES_STATUS Recommendations ✓

- [x] `docs/index.html` rebuilt — now shows v4.0.0 (was v3.1.0)
- [x] `docs/index_v3_1.html` → archived to `docs/archive/index_v3_1_0_ARCHIVE.html` with deprecation banner
- [x] `docs/index_v3.html` → archived to `docs/archive/index_v3_0_0_ARCHIVE.html` with deprecation banner
- [x] `docs/presentation.html` → archived to `docs/archive/presentation_v2_5_0_ARCHIVE.html` with deprecation banner
- [x] `docs/archive/README.md` created
- [x] `docs/visualizations_v3/README.md` created — clarifies naming convention

Phase 2: Navigation ✓

- [x] `docs/NAVIGATOR.html` created — comprehensive quick-access index with 6 sections:
- Canonical Presentations (2 files, clearly marked)
- Interactive Visualizations (5 core + 21 advanced, categorized)
- Technical Documentation (9 pages)
- Data & Configuration (7 data files, SSoT prominently featured)
- Build Artifacts & Reports
- Archive (with warning)

Phase 3: Review Blueprint ✓

- [x] `PROJECT_REVIEW_BLUEPRINT.md` created — reusable template with 7 sections

Phase 4: Stale File Audit ✓

- [x] `STALE_FILES_AUDIT.md` created — every file reviewed with concrete decision

Phase 5: Ambiguity Audit ✓

- [x] `AMBIGUITY_FIXES.md` created — 8 issues identified, 4 fixed, 4 documented for future

Phase 6: This Guide

- [x] CONTINUATION_GUIDE.md (you're reading it)
-

What Remains (Optional / Future Sprints)

Priority HIGH — Next session recommended

1. **Full rebuild of triage pages** — Run `python3 src/build_all.py` to regenerate `dashboard.html`, `executive_summary.html`, `calculations.html`, `rtm_traceability.html`, `handover.html` with latest SSoT data
2. **Add** `<meta name="dashboard-version" content="4.0.0">` **tag** to `_page()` in `src/generate_dashboard.py`

Priority MEDIUM — When convenient

1. **Add SSoT footer** to `index_v4_0.html` and `STAKEHOLDER_PRESENTATION.html` referencing `data/config.yaml`
2. **Delete legacy outputs** — `outputs/html/`, `outputs/versioned/`, `outputs/json/`, `outputs/md/`
3. **Regenerate hero pages** — create `src/build_heroes.py`

Priority LOW — Future versions

1. **Automate** `STAKEHOLDER_PRESENTATION.html` generation from SSoT
 2. **Unify build pipeline** — single `build.sh` entry point
 3. **CI/CD version consistency check** — `grep` all `docs/*.html` for version after build
 4. **Slide versioning** — `<meta>` tags in all generated HTML
-

If Starting a New Chat

Copy the following as the first message:

I'm continuing work on the QPLANT Cryo Leak-Rate Dashboard.

Project location: /home/ubuntu/cryo_leak_rate_dashboard
Current version: v4.0.0

Key files to read first:

1. CONTINUATION_GUIDE.md – what's done, what remains
2. STALE_FILES_AUDIT.md – file inventory and decisions
3. AMBIGUITY_FIXES.md – known issues
4. PROJECT_REVIEW_BLUEPRINT.md – review template
5. docs/NAVIGATOR.html – quick-access index
6. data/config.yaml – Single Source of Truth
7. VERSION.json – version metadata

Recent changes (2026-05-12):

- Rebuilt docs/index.html to v4.0.0
- Archived 3 stale presentations to docs/archive/
- Created docs/NAVIGATOR.html navigator
- Created 4 review/audit documents
- All changes committed to git

Next priority tasks:

1. Run python3 src/build_all.py to rebuild triage pages
2. Add <meta name="dashboard-version"> to auto-generated pages
3. Add SSoT reference footer to canonical presentations

Project Health Summary

Metric	Status
Version consistency	✓ All active files show v4.0.0
Canonical files identified	✓ 2 presentations clearly marked
Stale files handled	✓ 3 archived, 0 misleading files in docs/ root
Navigation	✓ NAVIGATOR.html provides complete index
Build system	✓ Scripts functional, SSoT in place
Tests	✓ Passing (per manifest)
Documentation	✓ 4 new review/audit documents
Git	✓ Clean working tree (pending commit of this session)
