Hero Pages

Audience	URL
Executive (ROI)	<code>.../heroes/executive.html</code>
Technical (Specs)	<code>.../heroes/technical.html</code>
Compliance (Standards)	<code>.../heroes/compliance.html</code>

Development (Local)

```
# Start server
cd cryo_leak_rate_dashboard
python -m http.server 8000 -d docs

# Access
open http://localhost:8000/NAVIGATOR.html
```

CI/CD Status

Resource	URL
Actions	<a href="https://github.com/<owner>/cryo_leak_rate_dashboard/actions">https://github.com/<owner>/cryo_leak_rate_dashboard/actions
Latest Release	<a href="https://github.com/<owner>/cryo_leak_rate_dashboard/releases/latest">https://github.com/<owner>/cryo_leak_rate_dashboard/releases/latest
Pages Deployment	Check Actions → “Deploy to GitHub Pages”

Quick Commands

```
# Full build
./build.sh

# Quick validation
./validate.sh --quick

# Run tests
pytest tests/ -v

# Check links
python scripts/validate_links.py --report

# Compute hashes
python scripts/compute_hashes.py docs/ > dist/hashes.json

# Create release
./scripts/release.sh v4.1.0

# One-command deploy
./scripts/deploy.sh
```
