

SLIDE_PACKAGES_STATUS.md

Generated: 2026-05-12
Project: MYRRHA QPLANT Cryo Leak-Rate Dashboard
Scope: All HTML presentation/slide files — inventory, canonical status, v4.0.0 alignment, and action plan

1 — Inventory of HTML Slide & Presentation Files

1.1 Primary Slide Decks (hand-curated / master presentations)

#	File	Slides	Purpose / Audience	Size	Last Modified	Status
1	docs/index_v4_0.html	42	Master navigator — all topics (technical + executive)	79 KB	2026-05-10	✅ v4.0.0 aligned (canonical)
2	docs/STAKEHOLDER_PRESENTATION.html	10	Executive summary — decision-makers, management	20 KB	2026-05-10	✅ v4.0.0 aligned
3	docs/index_v3_1.html	42	Prior master navigator (v3.1.0)	79 KB	2026-05-10	⚠️ Stale — superseded by v4.0
4	docs/index_v3.html	34	Prior master navigator (v3.0.0)	59 KB	2026-05-09	⚠️ Stale — superseded by v4.0
5	docs/presentation.html	5	Minimal material-specific summary (v2.5.0)	1.6 KB	2026-05-08	⚠️ Legacy — v2.5.0 artifact

1.2 Triage Dashboard Pages (auto-generated by `src/generate_dashboard.py`)

#	File	Purpose / Audience	Size	Last Modified	Status
6	<code>docs/index.html</code>	Landing / handover hub page	4.9 KB	2026-05-10	 Auto-generated (still shows v3.1.0)
7	<code>docs/dashboard.html</code>	Triage dashboard — engineer	4.1 KB	2026-05-08	 Auto-generated
8	<code>docs/executive_summary.html</code>	Executive triage view	2.5 KB	2026-05-08	 Auto-generated
9	<code>docs/calculations.html</code>	Detailed calculations — specialist	27 KB	2026-05-08	 Auto-generated
10	<code>docs/rtm_traceability.html</code>	RTM traceability matrix	7.6 KB	2026-05-08	 Auto-generated
11	<code>docs/handover.html</code>	Formal handover document	8.4 KB	2026-05-08	 Auto-generated
12	<code>docs/triage_compliance.html</code>	Standards compliance grid	90 KB	2026-05-08	 Auto-generated

1.3 Topic-Specific Deep-Dive Pages

#	File	Purpose	Size	Status
13	docs/compressors/HP_Redundancy_Analysis.html	HP compressor redundancy N+1 analysis	7.8 KB	 Auto-generated (v3.1)
14	docs/compressors/WCS_HP_Protection.html	WCS. HP supply protection logic	7.9 KB	 Auto-generated (v3.1)
15	docs/liquid_helium/Liquid_Operations_Guide.html	Liquid helium operations guide	7.3 KB	 Auto-generated (v3.1)

1.4 Hero Pages (audience-specific landing pages, auto-generated v3.0)

#	File	Audience Persona	Size	Status
16	docs/heroes/design.html	Design engineer	11 KB	 v3.0 era, no v4.0 updates
17	docs/heroes/risk.html	Risk/safety engineer	8.6 KB	 v3.0 era
18	docs/heroes/materials.html	Materials specialist	6.4 KB	 v3.0 era
19	docs/heroes/operations.html	Operations team	5.9 KB	 v3.0 era
20	docs/heroes/control.html	Controls/instrumentation	5.9 KB	 v3.0 era
21	docs/heroes/cost.html	Cost/procurement	5.7 KB	 v3.0 era
22	docs/heroes/interface.html	Interface engineer	4.8 KB	 v3.0 era

1.5 Plotly Visualizations

Directory	Count	Purpose	Status
docs/plots/	5	Core triage plots (leak vs loss, temp, cost, fleet, reliability)	 Auto-generated
docs/visualizations/	18 + 9	v3.0 extended chart suite + legacy charts	 v3.0 era data
docs/visualizations_v3/	21	v3.1 advanced analytics (MC, PCA, compressor, liquid He)	 Auto-generated (v3.1)
docs/tables/	4	Standalone data tables	 v3.0 era

1.6 Legacy / Build Outputs (not user-facing)

Directory	Count	Purpose	Status
outputs/html/	10 + 5 plots	OUTPUT_1_BASELINE original build	 Legacy v1 output
outputs/versioned/.../	2 × (10 + 5)	Timestamped snapshots of OUTPUT_1	 Archive only
htmlcov/	~15	pytest-cov coverage report	 Auto-generated (dev only)
dist/test-report.html	1	Test results report	 Auto-generated

2 — Canonical Status

2.1 Canonical Master Presentation

★ CANONICAL: docs/index_v4_0.html (42 slides, v4.0.0)

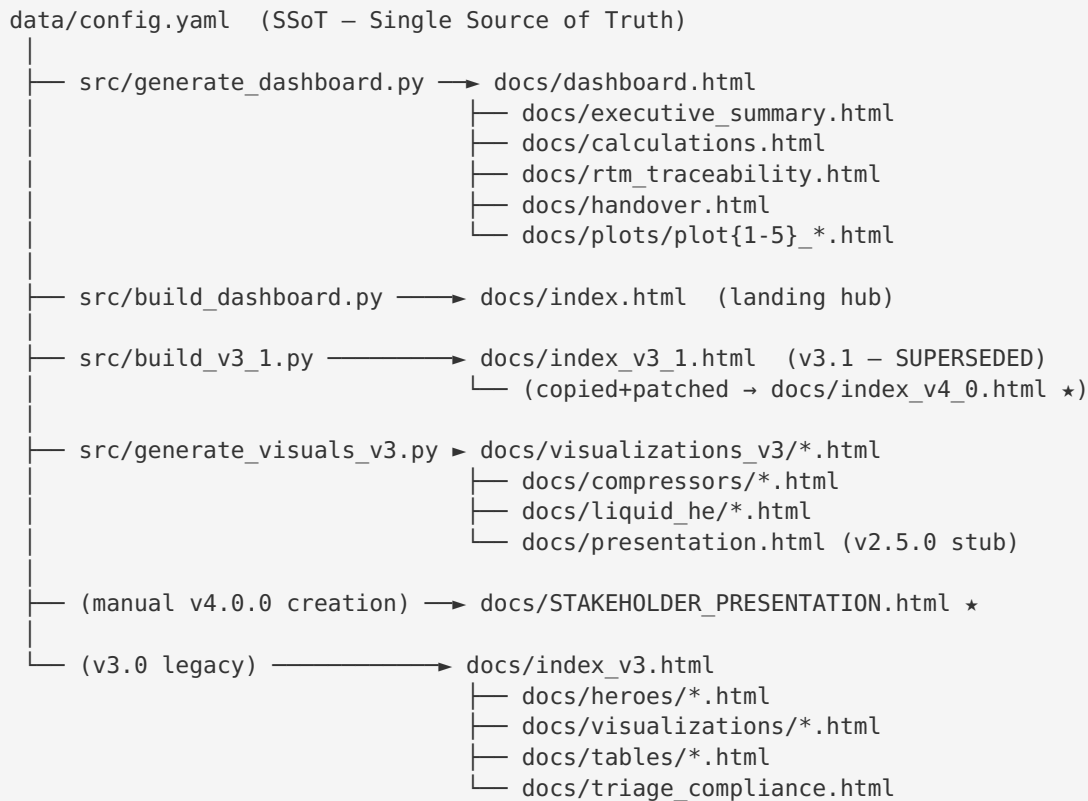

This is the authoritative master slide deck. It covers all topics: overview, liquid He operations, HP compressors, WCS.HP protection, derogation analysis, compliance, standards, and conclusions.

2.2 Canonical Executive Summary

★ CANONICAL: docs/STAKEHOLDER_PRESENTATION.html (10 slides, v4.0.0)

Condensed decision-maker presentation with correct €600k compressor CAPEX, €1.42M total, 1.2yr payback.

2.3 Relationship Tree

2.4 File Classification

Type	Files
Hand-curated master	index_v4_0.html ★, STAKEHOLDER_PRESENTATION.html ★
Copy-and-patch derivative	index_v4_0.html was cloned from index_v3_1.html and mass-updated
Auto-generated (current build)	index.html, dashboard.html, executive_summary.html, calculations.html, rtm_traceability.html, handover.html, triage_compliance.html, docs/plots/*
Auto-generated (prior version)	index_v3.html, index_v3_1.html, heroes/*, visualizations/*, visualizations_v3/*, compressors/*, liquid_he/*, tables/*
Archive/snapshot	outputs/html/*, outputs/versioned/*
Dev tooling	htmlcov/*, dist/test-report.html

3 — Consistency Analysis: v4.0.0 Alignment Check

3.1 Alignment Criteria

Criterion	Expected v4.0.0 Value	Rationale
Compressor count	3 (not 4)	v4.0.0 corrected to 3× FSD575 SFC VFD
Compressor CAPEX	€600,000 (not €720,000+)	3 × €200k
HP pressure	14 barg (not 10)	Corrected operating pressure
SSoT reference	data/config.yaml	New single source of truth
Version label	v4.0.0 or 4.0.0	Current release

3.2 Per-File Alignment Results

File	3 com-pressors?	€600k?	14 barg?	con-fig.yaml?	Version?	Verdict
in-dex_v4_0.html ★	✓ “3 or 4” (discusses both)	✓	✓	✗ no ref	✓ v4.0.0	⚠ Near-aligned
STAKEHOLDER_PRESENTATION.html ★	✓ 3× explicit	✓ €600k	✓ 14 barg	✗ no ref	✓ v4.0.0	✓ Fully aligned
in-dex_v3_1.html	✗ “4 compressors: 4 × €224,400 = €897,600/yr”	✓ €600k (mixed)	✓ 14 barg	✗	✗ v3.1.0	✗ Stale — has 4-compressor refs
in-dex_v3.html	N/A (no compressors)	✓ €600k ref	N/A	✗	✗ v3.0.0	⚠ Legacy
in-dex.html (hub)	N/A	N/A	N/A	✗	✗ v3.1.0 label	⚠ Version label out-dated
presentation.html	N/A	N/A	N/A	✗	✗ v2.5.0	⚠ Legacy
dash-board.html	N/A	N/A	N/A	✗	N/A	🔄 Needs rebuild
heroes/*.html (7 files)	N/A	valve-level CAPEX only	N/A	✗	✗ v3.0 era	⚠ Not updated
com-pressors/*.html (2)	—	—	—	✗	v3.1 era	⚠ Not updated
visualizations_v3/*.html (21)	N/A (data-driven)	N/A	N/A	✗	v3.1 era	🔄 Data-driven

3.3 Specific Inconsistencies Found

1. `index_v3_1.html` **line 577:**
`"4 compressors: 4 × €224,400 = €897,600/yr total energy savings"` — should reference 3 compressors
 2. `index_v3_1.html` **lines 659, 706, 1471:** Contain `4 ×` references in availability/reliability calculations — should use 3
 3. `index.html` **header:** Still says `"v3.1.0"` — should say `"v4.0.0"`
 4. `index_v4_0.html` **slide 11 KPI:** Shows `"3 or 4"` as compressor options — acceptable as design discussion, but could be clearer that 3 is the recommended baseline
 5. **No files reference** `data/config.yaml` as SSoT — this is a gap in documentation transparency
-

4 — Update Requirements

Priority Legend

-  **Critical** — actively misleading if served to stakeholders
-  **High** — should be fixed before next handover
-  **Medium** — nice to have, non-urgent
-  **Low** — future improvement only

4.1 Action Items

#	File	What Needs to Change	Why	Effort	Priority
1	docs/in-dex.html	Update version label from v3.1.0 → v4.0.0 ; update links to point to in-dex_v4_0.html	Hub page shows wrong version	Quick fix — rebuild via src/build_dashboard.py	 Critical
2	docs/in-dex_v3_1.html	Do NOT edit — archive as-is; add deprecation banner or remove from distribution	Contains stale 4-compressor data; editing would break its archival value	Quick fix — add <!-- SUPERSEDED --> banner	 High
3	docs/in-dex_v4_0.html	(a) Add config.yaml SSoT reference in overview slide; (b) clarify “3” as recommended baseline on slide 11	Transparency and consistency	Quick fix — 2 lines	 Medium
4	docs/dashboard.html	Rebuild with src/generate_dashboard.py to pick up v4.0.0 data	May contain stale calculation results	Medium — requires full rebuild	 High
5	docs/execute_summary.html	Rebuild (same as above)	Same	Medium	 High
6	docs/calculations.html	Rebuild	Same	Medium	 High
7		Rebuild	Same	Medium	 High

#	File	What Needs to Change	Why	Effort	Priority
	docs/ rtm_traceability.html				
8	docs/han-dover.html	Rebuild	Same	Medium	● High
9	docs/heroes/*.html (7 files)	Consider re-generating with v4.0 data or marking as “v3.0 reference”	No compressor/system-level data, but hero pages lag behind	Full rewrite needed	● Medium
10	docs/presentation.html	Delete or archive — fully superseded	v2.5.0 artifact, 5 slides only	Quick fix	● Low
11	docs/visualizations_v3/	Re-run <code>src/generate_visuals_v3.py</code> with v4.0 config	Charts use v3.1 data/parameters	Medium — scripted	● Medium
12	docs/compressors/*.html	Verify alignment with 3-compressor baseline	May reflect v3.1 assumptions	Quick check	● Medium

5 — Next Steps

5.1 Immediate Actions (this sprint)

1. **Rebuild triage pages** — Run `python src/build_all.py` (or equivalent) to regenerate `dashboard.html`, `executive_summary.html`, `calculations.html`, `rtm_traceability.html`, `han-dover.html` with v4.0.0 data from `config.yaml`
2. **Update docs/index.html** — Run `python src/build_dashboard.py` with `VERSION` set to `4.0.0` so the landing hub reflects the current version
3. **Add deprecation banner to index_v3_1.html** — Insert a visible `<div>` at top: “⚠ This is v3.1.0 — superseded by v4.0.0 (index_v4_0.html)”

5.2 Short-Term Improvements (within 1 week)

1. **Regenerate visualizations_v3/** — Re-run `generate_visuals_v3.py` pointing at `config.yaml` to ensure compressor charts use 3-unit baseline

2. **Add SSoT annotation** — Add a footer or badge on `index_v4_0.html` and `STAKEHOLDER_PRESENTATION.html` referencing `data/config.yaml` as the single source of truth
3. **Clean up legacy files** — Move `docs/presentation.html` and `docs/index_v3.html` to `docs/archive/` or delete

5.3 Long-Term Enhancements (future versions)

1. **Automate slide generation** — Create `src/build_stakeholder.py` that generates `STAKEHOLDER_PRESENTATION.html` from `config.yaml` to prevent manual drift
2. **Single build pipeline** — Unify `build_dashboard.py`, `generate_dashboard.py`, `build_all.py`, `generate_visuals_v3.py`, and `build_v3_1.py` into one `build.sh` entry point that regenerates everything from SSoT
3. **Slide versioning** — Add `<meta name="dashboard-version" content="4.0.0">` to all generated HTML for machine-readable version tracking
4. **CI/CD integration** — Add a GitHub Actions check that greps all `docs/*.html` for version consistency after each build

5.4 Recommended Workflow for Keeping Presentations in Sync

Rule: Never hand-edit generated files. Always update `data/config.yaml` → rebuild → commit.

6 — Package Recommendations

6.1 Stakeholder Distribution Bundles

Bundle	Target Audience	Files to Include	Format
Executive Package	Management, decision-makers	STAKEHOLD- ER_PRESENTATION.html + index_v4_0.html (slides 1-4, 40-42)	HTML (self-contained) or PDF print
Technical Package	Engineers, specialists	index_v4_0.html (all 42 slides) + calculations.html + rtm_traceability.html + docs/plots/*	HTML bundle (zip)
Operations Package	Operations, maintenance	index_v4_0.html (slides 20-27: WCS.HP) + Li- quid_he/Liquid_Operations_Guide.html + compressors/*.html	HTML bundle
Compliance Package	QA, regulatory	trriage_compliance.html + rtm_traceability.html + handover.html	HTML + PDF
Full Handover	Incoming agent / contractor	dist/handover.zip (everything)	ZIP archive

6.2 Internal / Technical Only (do NOT distribute)

- docs/heroes/*.html — v3.0 era, not updated
- docs/presentation.html — v2.5.0 legacy stub
- docs/index_v3.html, docs/index_v3_1.html — superseded versions
- outputs/html/*, outputs/versioned/* — build snapshots
- htmlcov/* — dev coverage reports

6.3 Versioning Strategy

Element	Convention
File naming	<code>docs/index_v{major}_{minor}.html</code> (e.g. <code>index_v4_0.html</code>)
Archive policy	Keep previous version as <code>index_v{prev}.html</code> , add deprecation banner
Version metadata	Embed <code><meta name="dashboard-version" content="X.Y.Z"></code> in <code><head></code>
SSoT link	Every generated page should reference <code>data/config.yaml</code> in footer
Distribution	Always distribute from <code>dist/handover.zip</code> built by <code>package.sh</code>

6.4 Recommended Export Formats

Audience	Preferred Format	How
Executives	PDF (via print mode button)	Open HTML → click “Print mode” → <code>Ctrl+P</code>
Engineers	Live HTML (local Python server)	<code>python -m http.server 8000</code> in <code>docs/</code>
External sharing	GitHub Pages	Push to <code>gh-pages</code> branch
Offline review	Self-contained ZIP	<code>./package.sh</code> → <code>dist/handover.zip</code>

Summary Dashboard

Total HTML files in docs/:	~70	(presentations + charts + tables + heroes)
Canonical presentations:	2	(index_v4_0.html ★, STAKEHOLD-ER_PRESENTATION.html ★)
Auto-generated triage pages:	7	(dashboard, exec, calc, rtm, handover, compliance, hub)
Superseded/legacy presentations:	3	(index_v3, index_v3_1, presentation)
Topic deep-dives:	3	(HP redundancy, WCS.HP, liquid He)
Hero pages (v3.0):	7	(audience-specific, not updated)
Plotly visualizations:	~48	(across 3 directories)
Data tables:	4	(standalone HTML tables)
v4.0.0 fully aligned:	2	✓
v4.0.0 near-aligned:	1	⚠ (index_v4_0 – minor "3 or 4" wording)
Needs rebuild from SSoT:	7	↺ (triage pages)
Stale / superseded:	13	⚠ (v3.x era files)
Critical fixes needed:	1	● (index.html version label)
