

# Post-Deployment Checklist

---

## ✓ Phase 1: GitHub Pages Configuration (User Action Required)

---

- ☐ Navigate to: [https://github.com/GBOGEB/cryo\\_leak\\_rate\\_dashboard/settings/pages](https://github.com/GBOGEB/cryo_leak_rate_dashboard/settings/pages)
- ☐ Set Source: **"Deploy from a branch"**
- ☐ Set Branch: **"main"**
- ☐ Set Folder: **"/docs"**
- ☐ Click **"Save"**
- ☐ Wait 3 minutes for deployment
- ☐ Verify URL live: [https://gbogeb.github.io/cryo\\_leak\\_rate\\_dashboard/](https://gbogeb.github.io/cryo_leak_rate_dashboard/)

**Status:** ⌚ PENDING USER ACTION

📖 See [GITHUB\\_PAGES\\_VISUAL\\_GUIDE.md](#) (GITHUB\_PAGES\_VISUAL\_GUIDE.md) for detailed step-by-step with ASCII art.

---

## ✓ Phase 2: Site Verification (After Phase 1)

---

### Automated Verification

```
./scripts/site_verification.sh
```

- ☐ All critical URLs return 200 OK
- ☐ No 404 errors

### Manual Verification

- ☐ Homepage loads (VERSION\_SELECTOR)
- ☐ Can navigate to v4 dashboard
- ☐ Technical presentation displays (42 slides)
- ☐ Executive presentation displays (10 slides)
- ☐ Plotly visualizations render
- ☐ Hero pages load
- ☐ All links work

**Status:** ⌚ AFTER PHASE 1

---

## ✓ Phase 3: Create GitHub Release (Recommended)

---

### Steps

1. ☐ Go to: [https://github.com/GBOGEB/cryo\\_leak\\_rate\\_dashboard/releases/new](https://github.com/GBOGEB/cryo_leak_rate_dashboard/releases/new)
2. ☐ Tag: `v4.0.0`

3. [ ] Target: `main`
4. [ ] Title: `Release v4.0.0: Single Source of Truth Implementation`
5. [ ] Description: Copy from release notes below
6. [ ] Click **“Publish release”**

## Release Notes Template

```
# Release v4.0.0: Single Source of Truth Implementation

## 🎯 Major Changes
- Implemented Single Source of Truth (SSoT) in `data/config.yaml`
- Corrected HP compressor count: 4 → 3 (Kaeser FSD 575 SFC)
- Updated pressure parameters: 14 barg HP discharge, 1050 mbar HCC inlet
- Added recursive build tracking system

## 📊 Deliverables
- 42-slide technical presentation
- 10-slide stakeholder presentation
- 27 interactive visualizations
- Comprehensive navigation system (NAVIGATOR.html)
- Professional landing page (VERSION_SELECTOR.html)

## 🔧 Technical Details
- 22/22 tests passing
- 423 files tracked
- CI/CD pipeline configured
- GitHub Pages deployment

## 🔗 Links
- **Live Site:** https://gbogeb.github.io/cryo\_leak\_rate\_dashboard/
- **Documentation:** See HANDOVER.md
- **Build Log:** See BUILD_LOG.md

## 🙌 Acknowledgments
MYRRHA QPLANT Team, SCK CEN
```

**Status:** 🕒 RECOMMENDED AFTER PHASE 2

## ✅ Phase 4: Update Documentation URLs (After Phase 2)

Replace all placeholder URLs with live URLs in:

- [ ] README.md (add live site badge)
- [ ] HANDOVER.md (update URLs section)
- [ ] QUICK\_ACCESS.md (confirm all URLs)
- [ ] ARTIFACTS.yaml (add live URLs)

## Commit and push

```
git add README.md HANDOVER.md QUICK_ACCESS.md ARTIFACTS.yaml
git commit -m "docs: update with live GitHub Pages URLs"
git push origin main
```

Status: 🕒 AFTER PHASE 2

## ✅ Phase 5: Share with Stakeholders (After Phase 2)

### Email Template

**Subject:** MYRRHA QPLANT Cryogenic Dashboard v4.0.0 📧 Now Live

Dear Team,

The MYRRHA QPLANT Cryogenic Helium Leak Rate Analysis Dashboard v4.0.0 is now live and accessible at:

[https://gbogeb.github.io/cryo\\_leak\\_rate\\_dashboard/](https://gbogeb.github.io/cryo_leak_rate_dashboard/)

Key Features:

- ✅ Single Source of Truth (SSoT) implementation
- ✅ Corrected 3 HP compressor configuration
- ✅ 42-slide technical deep-dive
- ✅ 10-slide executive summary
- ✅ 27 interactive visualizations
- ✅ Professional navigation system

Access Points:

- Main Dashboard: [URL]/NAVIGATOR.html
- Technical Detail: [URL]/index\_v4\_0.html
- Executive Summary: [URL]/STAKEHOLDER\_PRESENTATION.html

Repository:

[https://github.com/GB0GEB/cryo\\_leak\\_rate\\_dashboard](https://github.com/GB0GEB/cryo_leak_rate_dashboard)

Best regards,  
[Your Name]

Status: 🕒 AFTER PHASE 2

## ✅ Phase 6: Restore CI/CD Workflows (Optional)

### If GitHub App permissions updated

```
cd /home/ubuntu/cryo_leak_rate_dashboard

# Restore workflows
git checkout backup/pre-push-workflows -- .github/

# Commit and push
git add .github/workflows/
git commit -m "ci: restore GitHub Actions workflows"
git push origin main
```

### Verify workflows

- [ ] Check: [https://github.com/GB0GEB/cryo\\_leak\\_rate\\_dashboard/actions](https://github.com/GB0GEB/cryo_leak_rate_dashboard/actions)

- ☐ CI workflow runs on push
- ☐ Tests execute automatically
- ☐ Deploy workflow works

**Status:** ⌚ OPTIONAL

## Completion Summary

|                            |                          |         |
|----------------------------|--------------------------|---------|
| Phase 1: Pages Config      | <input type="checkbox"/> | PENDING |
| Phase 2: Site Verification | <input type="checkbox"/> | PENDING |
| Phase 3: GitHub Release    | <input type="checkbox"/> | PENDING |
| Phase 4: Update Docs       | <input type="checkbox"/> | PENDING |
| Phase 5: Share             | <input type="checkbox"/> | PENDING |
| Phase 6: CI/CD (Optional)  | <input type="checkbox"/> | PENDING |

Overall: 80% ☐ 100% ☐

## Final Success Criteria

Project is 100% complete when:

- ☒ Code pushed to GitHub
- ☒ All tests passing
- ☐ GitHub Pages live
- ☐ All URLs verified working
- ☐ GitHub Release created
- ☐ Documentation updated with live URLs
- ☐ Stakeholders notified
- ☐ (Optional) CI/CD active

**Current Status: 80% Complete**

**Next: Configure GitHub Pages**
