

GitHub Repository Organization — GBOGEB

Generated: 2026-05-18

Scope: Multi-repo strategy for MYRRHA QPLANT Cryogenic Engineering

Account: github.com/GBOGEB (<https://github.com/GBOGEB>)

Repository Landscape — Current State

Tier 1 — Active Engineering Repos (daily use)

#	Repo	Language	Size	Description	Last Push	Status
1	cryo_leak_rate_dashboard	Python/ HTML	~local only	v4.0.0 QPLANT Cryo Dashboard (SSoT)	local	⚠️ No remote — needs push
2	CODEX (https://github.com/GBOGEB/CODEX)	Python	6 MB	MCB Blocks via MCP	2026-05-18	✅ Active
3	ABACUS (https://github.com/GBOGEB/ABACUS)	Python	82 MB	CodeLLM + Deep Agent file drop	2026-05-18	✅ Active
4	document-organization-system (https://github.com/GBOGEB/document-organization-system)	HTML	594 KB	Doc org system (v3 cryo dash- board folder)	2026-05-18	✅ Active
5	DOCX_RTM_Automation (https://github.com/GBOGEB/DOCX_RTM_Automation)	Python	25 MB	SoR, RTM, pipeline, markdown	2026-05-15	✅ Active

Tier 2 — Supporting Engineering Repos

#	Repo	Size	Description	Status
6	Q_engineering_tools (https://github.com/GBOGEB/Q_engineering_tools)	41 KB	Engineering tools	✓ Active
7	cryoplant-project (https://github.com/GBOGEB/cryoplant-project)	6 KB	CodeLLM start	🔄 Seed only
8	cryogenic-compliance (https://github.com/GBOGEB/cryogenic-compliance)	1 KB	Codes & standards	🔄 Seed only
9	CODESPACES_jupyter (https://github.com/GBOGEB/CODESPACES_jupyter)	708 KB	Jupyter codespace	🔄 Active

Tier 3 — Utility / Legacy / Forked Repos (60+ repos)

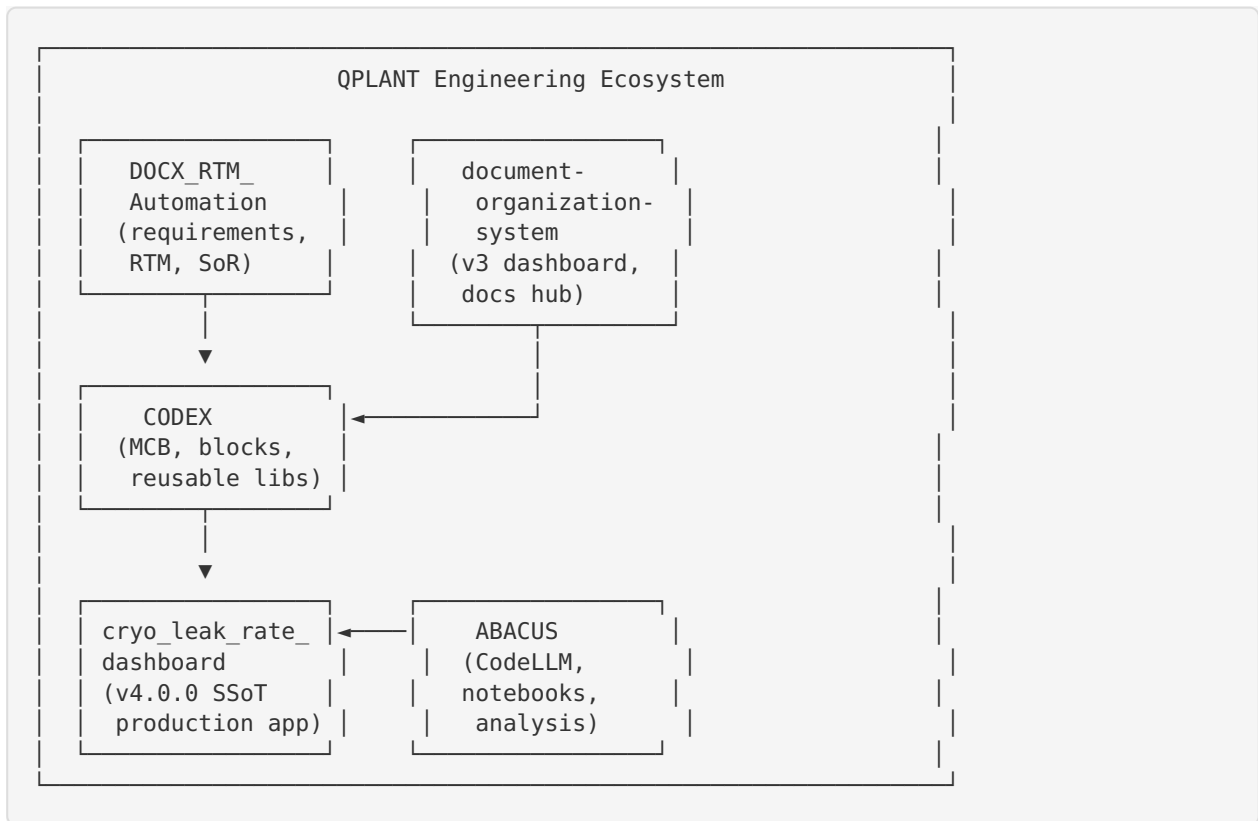

Includes forks of major projects (plotly.py, vscode, CoolProp, prettier, etc.) and utility repos. Not part of the core engineering workflow.

Proposed Multi-Repo Architecture

Core Repos — The “QPLANT Quartet”

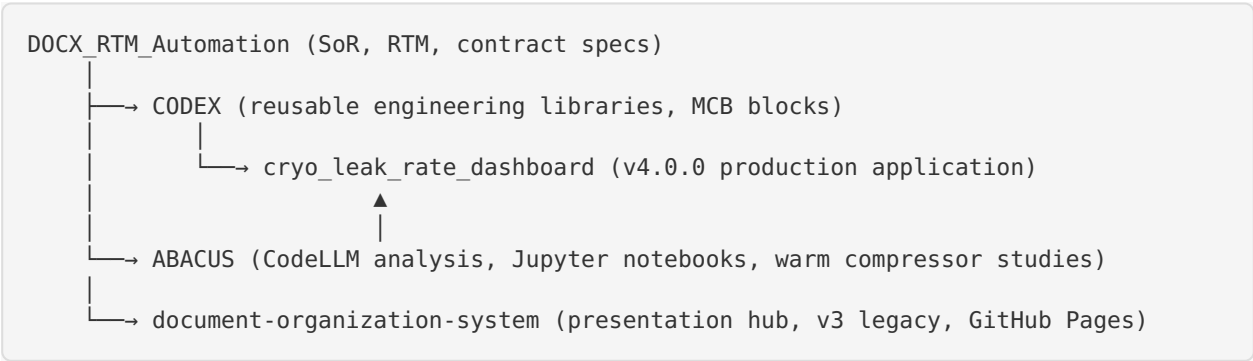

Content Distribution Matrix

Content Type	cryo_leak_rate_dashboard	CODEX	ABACUS	document-organization-system	DOCX_RTM_Automation
Dashboard HTML/JS/ CSS	✓ Master (v4.0.0)	✗	✗	📄 v3 legacy copy	✗
Calc engine (calc_leak_rate.py)	✓ Application copy	✓ Library source	✗	✗	✗
Plotly visualizations	✓ All 5 plots	✗	✓ Exploratory	✗	✗
RTM DOCX / SoR CSV	📄 Trace reference	✗	✗	📄 Rendered	✓ Master
Contract PDFs	📄 Reference link	✗	✗	📄 Rendered	✓ Master
Jupyter notebooks	✗	✗	✓ All	✗	✗
Config YAML/JSON	✓ Master	✓ Schema defs	✗	✗	✗
CI/CD workflows	✓ GH Pages deploy	✓ Tests + lint	✓ nbval	✓ Pages deploy	✓ Lint
Test suites	✓ pytest (18 tests)	✓ Unit tests	✓ Validation	✗	✓ Schema
Build scripts	✓ setup/build/validate/package	✓ Makefile	✗	✗	✓ Pipeline
Material properties DB	✓ helium_properties.json	✓ Materials library	✓ Analysis input	✗	✗
Compressor specs	✓ compressor_specs.json	✗	✓ Comparison studies	✗	✗
Warm compressor comparisons	✗	✗	✓ ALaT/LKT analysis	✗	✗

Content Type	cryo_leak_rate_dashboard	CODEX	ABACUS	document-organization-system	DOCX_RTM_Automation
Slide packages	✓ 42-slide navigator	✗	✗	✓ Presentation hub	✗
Handover docs	✓ Generated	✗	✗	✗	✓ RTM handover

Repository Dependencies

Cross-Repo References

From	To	Reference Type
cryo_leak_rate_dashboard	DOCX_RTM_Automation	RTM-047..067 traceability IDs
cryo_leak_rate_dashboard	CODEX	calc_leak_rate module origin
ABACUS	cryo_leak_rate_dashboard	Data inputs, config schemas
document-organization-system	cryo_leak_rate_dashboard	GitHub Pages v3→v4 migration
cryo_leak_rate_dashboard	Cryoworld offer docs	Valve spec source (image references)
cryo_leak_rate_dashboard	QPS Contract	Contract requirement source

Naming & Tagging Convention

Branch Names

- `main` — production/stable
- `feature/<ticket>-<short-desc>` — feature work

- `fix/<ticket>--<short-desc>` — bug fixes
- `release/v<major>.<minor>.<patch>` — release branches

Tag Format

- `v4.0.0` — semantic version
- `v4.0.0-rc1` — release candidate

Commit Prefix Convention

```
feat:    New feature
fix:     Bug fix
docs:    Documentation only
chore:   Build, CI, tooling
refactor: Code restructure
test:    Adding/fixing tests
release: Version bump + tag
```

Files Currently in Uploads (Not Yet Organized)

These uploaded files should be distributed across repos:

File	Target Repo	Folder
SoR_Requirements_Matrix.csv	DOCX_RTM_Automation	requirements/
QPLANT_HV02 exhaust for KAEZER (1).docx	DOCX_RTM_Automation	specifications/
QPLANT_Helium Recovery and Supply MAC - CR1299.docx	DOCX_RTM_Automation	specifications/
QPLANT_Interface and Terminal Points_ACC NF.docx	DOCX_RTM_Automation	specifications/
Technical Addendum_Reliability centred...docx	DOCX_RTM_Automation	addenda/
Addendum II - Cryoplant Technical Requirements.docx	DOCX_RTM_Automation	addenda/
Addendum II - Cryoplant Technical Requirements1212_1521.docx	DOCX_RTM_Automation	addenda/
QPS_Contract_pdf.pdf	DOCX_RTM_Automation	contracts/
QPS_Contract_mirror_DOCX.pdf	DOCX_RTM_Automation	contracts/
QPS (Addendum II)_Master.docx	DOCX_RTM_Automation	addenda/
Cryoworld offer 1.pptx	ABACUS or DOCX_RTM_Automation	vendor_offers/
MYRRHA warm-compressor comparison A.md	ABACUS	analyses/
HUMAN.index.html	document-organization-system	legacy/
SLIDE_PACKAGES_STATUS.md	cryo_leak_rate_dashboard	root (already there)
cryo_leak_rate_dashboard.zip	N/A (archive of this repo)	—

Repository Health Metrics

Metric	cryo_dashb oard	CODEX	ABACUS	doc-org- system	DOCX_RTM
Has remote?	✗ NO	✓	✓	✓	✓
CI/CD?	✓ (3 work- flows)	TBD	TBD	✓ (Pages)	TBD
Tests?	✓ (18 pass)	TBD	TBD	✗	TBD
README?	✓	TBD	TBD	TBD	TBD
GH Pages?	✓ (con- figured)	N/A	N/A	✓ Active	N/A
Latest ver- sion	v4.0.0	—	—	—	—
Open PRs	N/A (no re- mote)	?	?	?	?

Access & Permissions

- All repos under personal account `GB0GEB`
- Abacus AI Agent has push access via [GitHub App](https://github.com/apps/abacusai/installations/select_target) (https://github.com/apps/abacusai/installations/select_target)
- Repos are **public** (CODEX, ABACUS, document-organization-system confirmed public)
- Consider making contract docs repo **private** (QPS contract sensitivity)

Decision Log

Decision	Rationale	Date
Multi-repo over monorepo	Clear separation: app vs libs vs docs vs analysis	2026-05-18
cryo_leak_rate_dashboard as standalone	Self-contained deployable with GitHub Pages	2026-05-18
DOCX_RTM_Automation for all contract docs	Already contains SoR/RTM pipeline; natural home	2026-05-18
ABACUS for analysis notebooks	Already 82 MB with CodeLLM artifacts; right fit	2026-05-18
CODEX for reusable libraries	MCB blocks architecture already established	2026-05-18
