

QPLANT v2.5.0 Presentation (Material Specific)

Generated by src/generate_visuals_v3.py

Slide 5: Supplier comparison

Meca Inox (HDPE) — warm W1d, economic derogation (ambient class effectively 1×10^{-8})

Swagelok SS-42GSE (UHMWPE) — instrumentation, compliant with 1×10^{-9}

Reference charts: chart06_supplier_performance_matrix,
chart05_seal_material_comparison

Slide 8: Material cost breakdown

316 SS + electropolish + seal + welding are separated. HDPE and UHMWPE seal costs shown by DN06-DN50 sizes.

Reference chart: chart07_material_cost_breakdown

Slide 12: Operating condition recommendations

- Warm service: Meca Inox HDPE acceptable with derogation
- Cold service: Swagelok UHMWPE preferred
- Helium guard/internal protect: less strict classes acceptable

Reference charts: chart10, chart11, chart12, chart13

Slide 15: Visual evidence gallery

18 interactive plots generated with Plotly and export links (PNG/SVG/CSV).
